Stephen Leisz is an Associate Professor of Geography within the Department of Anthropology at Colorado State University. His research currently focusses on investigating the drivers of land-use and land-cover changes in Southeast Asia with a specific focus on Vietnam. In the past he has worked on projects investigating land-use and land-cover changes in eastern Indonesia, Madagascar, and West Africa. He has his Ph.D. from the University of Copenhagen in Denmark, a Master's of Science in Environmental Monitoring from the University of Wisconsin – Madison, and a Bachelors of Arts from Georgetown University.
